

Where Can You Work?

Go Further with Zebra Rugged Tablets

Let's Explore Your Industry

As a frontline worker, you're willing to go anywhere that duty calls. Vehicles, manufacturing plant floors, entire warehouses, cities and far beyond become your workspace. But when you're out there, you can't be disconnected from your team, your information or your tasks at hand. To go anywhere, everything has to go with you. See how the power of Zebra rugged tablets can get you there.

Field Services and Utilities

Go the Extra Mile

Make the most of every stop and operate on the same Windows® or Android™ systems that powers your apps and software for a unified, supported field experience. When you're driving, delivering or responsible for powering your town, you want to be able to free up your hands to do your job safely, anywhere. With Zebra tablets you can do your best work from any site – or even your vehicle – using whatever combination of applications you need to keep you going.

Hands-Free Connectivity

Cover Your Back

Paperwork Minus the Paper

Field Services and Utilities

Go the Extra Mile

Hands-Free Connectivity

Mount your tablet to access location information while keeping your hands on the wheel. Zebra tablets let you securely dock and quickly undock so you can use the same device while you're driving and on the go. When you do have a free hand, touchscreens that perform in any condition and rugged handle options deliver just the functionality you need – no matter where the job takes you.

Cover Your Back

Need to check on an invoice problem? Maybe a road closed, your route changed or something's missing on the truck. Make video calls, access schematics, find an alternate route and locate inventory all from one tablet. You can even take photos and capture signatures for split-second proof of delivery – and total peace of mind.

Paperwork Minus the Paper

Take all your records with you digitally. Using a tablet to access, complete, send and store paperwork drastically cuts time spent on recording and locating data. Plus, you instantly gain a greener and cleaner operation when you give workers devices that are eco-friendly and easy to clean.

Public Safety

Transform into a Proactive Police Department

Your force deserves secure, action-ready technology that can handle the elements. And, it needs to be portable and easy to dock and undock in seconds. With drop-proof designs and non-reflective glass, your tablet can go with you wherever a call takes you, at any time – day or night. Gain greater visibility and situational awareness with versatile rugged devices, purpose-built specifically for the conditions law enforcement must endure.

Less Paperwork, More Protection

Work in the Station and in the Field

Attract and Engage Recruits

Public Safety

Transform into a Proactive Police Department

Less Paperwork, More Protection

Paperless reporting can cut hours from officers' days – giving them more time to do what's important – protect their communities. Police officers can take notes while on foot, capture and store photographic evidence, issue e-citations and quickly get reports to downstream systems.

Work in the Station and in the Field

With the robust, run-anything Windows 10 platform and the ability to integrate with CAD systems, you can totally transform your emergency response team. Dispatch and officers can stay connected, while first responders get real-time updates about changing situations that help them know where they're needed most in that moment.

Attract and Engage Recruits

Policework has an enduring legacy – but legacy technology like outdated, fixed vehicle devices limit what officers can achieve, especially as the job becomes more challenging. Introducing modern technology not only helps attract and retain new recruits, but empowers officers to take their own initiative while on the job. It's next-gen intelligence for this generation's heroes.

Manufacturing

Plant the Seed for Better Performance

Whatever you convert, assemble or build, being on the production floor requires you to be both mobile and connected – for both productivity as well as safety. Managers and workers stay in touch and work in tandem with Zebra rugged tablets that integrate easily with other apps and systems on your choice of a Windows 10 or Android OS.

**More Mobility,
Better Maneuvering**

**Integrate Abilities to Power
Seamless Operations**

**Make Everyone
a Team Player**

Plant the Seed for Better Performance

More Mobility, Better Maneuvering

In large, tightly packed facilities you need technology that can traverse distance and obstacles, alike. When you have truly mobile technology, it increases your ability to be agile. Carry it by a handle, wear it on a shoulder strap or mount it on a cart or forklift. Whatever your preference, grab your tablet when you're ready to go – it's that easy to take intelligence anywhere.

Integrate Abilities to Power Seamless Operations

As the technology and business landscape becomes more intense and complex, enterprise workers need operating power that can run multiple, large applications 24/7. Combining Wi-Fi and even cellular-ready, Zebra rugged tablets operate on Android or Windows 10. Run everything you need, including third-party apps, SAP, Oracle, Microsoft Office 365 applications and WMS programs.

Make Everyone a Team Player

Looking for ways to empower your workers to achieve better results? Put the power in their hands as well as your own. Easily create pre-shift huddles, give employees access to important, real-time alerts and more. From managing workforces with easy-to-execute task lists to daily group memos, you can connect and encourage teams across the entire facility with screens big enough to easily read. Plus, with the built-in camera they are video-call enabled.

Transportation and Logistics

Strengthen your Supply Chain at Every Link

Real-world unpredictability can put a strain on even the most efficient supply chains. A weather event, power outage, road closure or a million other realities can test your ability to deliver as promised. Zebra tablets increase the resilience of your supply chain end to end, and at all points in between. Put rugged, real-time collaboration and go-anywhere problem solving where you need it most – in the hands of your frontline contributors to keep orders moving on time.

**Empower Your Team
End to End**

**Adapt to the Unforeseen
in Real-time**

**Enable Real-world
Efficiency**

Strengthen your Supply Chain at Every Link

Empower Your Team End to End

Protect your hard-earned progress by proactively improving the resilience of your supply chain at every link. Zebra rugged tablets turn your frontline workers into empowered experts who have instant access to the tools, information and team members they need to resolve issues on the spot and improve performance at every point along your supply chain.

Adapt to the Unforeseen in Real-time

Get more control of your supply chain – from supplier inputs, transportation partners, customer legacy systems and more. Turn your frontline workers into a connected network of control points across your operation. See what's coming, adapt to unexpected challenges in real time and reroute to quickly resolve and keep your operations moving smoothly.

Enable Real-world Efficiency

Supply chain success is about achieving a lean, efficient, uninterrupted flow of raw materials, components and products. Turn your frontline workers into a true competitive advantage, with powerful mobile capabilities that enable you to confidently reduce waste and inefficiency, and simultaneously increase accuracy, consistency and throughput.

Retail

Empower a Customer-facing Focus

Give your associates the confidence to provide accurate answers – from product knowledge to pricing, and inventory to upcoming deliveries – anywhere, anytime. With Zebra rugged tablets, you can empower your associates with retail-proven mobile abilities that bring order to the aisles, eliminate unnecessary tasks and free-up more time for customer engagement. It's a sure path to enthusiastic employees and happier, more loyal customers.

Elevate the Customer Experience

Equip for Every Answer

Gain Time for Engagement

Empower a Customer-facing Focus

Equip for Every Answer

When customers have access to better information than your associates, it's time to change the equation. Zebra's enterprise tablets do just that, by giving associates instant access to rich data, inventory information and fulfillment capabilities to quickly satisfy the increasing demands of smart-phone-equipped customers. Free your team to rove the aisles with confidence, knowing they have the answers to resolve shopper issues.

Gain Time for Engagement

Today's associates are balancing endless task lists with meeting shopper needs. Help them save steps and time by equipping them with retail-ready, mobile tablets. Easy to use, accurate, powerful enough to run multiple large applications, they're also outfitted with big non-reflective screens to easily view and share with customers. Expedite tasks and create more time to help customers.

Elevate the Customer Experience

Customers use brick and mortar stores in different ways at different times. Expand your associates' ability to impact a wide spectrum of customer needs and expectations, from fully stocked shelves, to unobtrusive responsive assistance, to fully engaged resolution of specialized requests, to mobile ordering and pop-up checkouts. Engage effortlessly to serve in whatever way the customer desires, to build loyalty and bigger sales.
