LAUBNER MobilePrinterBase

The LAUBNER MobilePrinterBase forklift mount ensures secure and professional placement of desktop-label printers made by TSC, Zebra and others on various types of industrial trucks.

Special shock absorbing springs protect printers from shocks and vibrations. Stainless steel design turns the MobilePrinterBase into a robust and permanently corrosion-protected piece of hardware. It is mounted on a vehicle via rubber-metal adapters and optional non-slip magnetic feet.

The MobilePrinterBase features a universal design and is suitable for a wide range of different printer models. It offers printer options such as dispenser or automatic cut-off unit. The LAUBNER MobilePrinterBase in conjunction with a thermal transfer label printer is a unique solution for unrestricted label printing on any desired material.

The printers are either integrated directly into a forklift terminal via the USB interface or via their own WLAN client in the company network. Perfect WLAN roaming is a basic requirement for functionality and is fully supported by our WLAN Client Bridge MC1.

All printing units are operated using nominal 24 V DC. Voltage adjustments are carried out through our high quality universal DC/DC converter, electrically isolated from the vehicle's board system, which is important for flawless performance.

The stability and reliability of the solution has been confirmed by many installations for years and was awarded the Innovation Prize IT in the area of hardware in 2016.

** The Initiative Mittelstand awards this award to particularly innovative IT solutions with high benefits for SMEs.*

Technical Data:

- Stainless steel design
- Universal design suitable for printers made by: TSC, Zebra and other
- Available in two versions: low profile – height 58mm, high profile – height 80mm for installing a wireless-client-bridge
- Measurements: WxDxH 195x235x58(80) mm
- Three-point mounting with M8 threaded bush. The screw connection is decoupled from vehicle vibrations by the integrated rubber adapter.
- Optional non-slip magnetic feet or variable fastening using the optional RAM mount fastening system.
- Delivered as a self-installation kit or readily installed alongside the printer

Currently supported printer models:

- TSC TC200/300
- Zebra ZD Serie

Productively used at:

- John Deere, LTG, Rhenus, Bomag, Unielektro, BK Giulini, Fega & Schmitt
